(469)-449-0434 | tirthmehta1099@gmail.com | [LinkedIn](#) | [Portfolio](#)

EDUCATION

University of Texas at Dallas

Dallas, Texas

Master of Science in Computer Science

Gujarat Technological University

Ahmedabad, India

Bachelor of Engineering in Computer Engineering

TECHNICAL SKILLS

- **Programming languages:** Java, Python, JavaScript (Node.js), Dart, C#
- **Systems & Integrations:** API Integration, Workflow Automation, Data Pipelines, System Design
- **Backend / Automations:** Microservices, Batch Processing, Data Sync Pipelines
- **AI / APIs:** Anthropic Claude API, OpenAI API, REST API, GraphQL
- **Databases:** MySQL, Firebase, MongoDB, Redis (TTL caching, delta sync)
- **Frameworks:** Spring Boot, React, React Native, Hibernate, Flutter, Bootstrap
- **Cloud & Tools:** AWS S3, GitHub, Git Desktop, Jira, Confluence, Figma

EXPERIENCE

Dennis Dillon RV

Boise, ID

Backend & Integration Engineer

Dec 2024- Present

- Architected a full-stack automation system integrating 3 supplier APIs (Lightspeed, WPS, Parts Unlimited) with multiple auth methods, enabling real-time inventory and pricing sync
- Built a high-scale inventory engine processing 95k+ SKUs every 2 hours, using Redis caching and delta updates to reduce Shopify API costs by 95%
- Engineered end-to-end dropship automation across 12 warehouses, handling single and split fulfillment, auto-generating purchase orders, and syncing tracking data to Shopify
- Integrated Claude AI with structured prompts to generate SEO-optimized product content, improving discoverability and AI search visibility
- Designed and maintained API integration workflows and automation pipelines across multi-vendor systems
- Resolved Shopify API breaking changes by refactoring to modern GraphQL mutations, maintaining system stability in production

Owting

Los Angeles, CA

Software Developer

Mar 2024-Aug 2024

- Redesigned user profile UI/UX in React Native aligned with Figma specifications, increasing user engagement by 30%; managed full development lifecycle using Jira, Confluence, and Git-based version control.

Ubique Networks

Los Angeles, CA

Full Stack Developer

Jun 2023-Dec 2023

- Built a cross-platform ordering app for bars and clubs using Flutter, cutting order time by 5 minutes per transaction and boosting customer satisfaction; integrated Stripe API for secure payments and Google Sign-in, increasing registrations by 40% and reducing login time by 25%.
- Developed UI with HTML5, CSS3, JavaScript, and Bootstrap 4. Used Firebase for data storage and managed version control using Git and GitHub throughout the development lifecycle.

PROJECTS

ModusMove - AI Workout Planning System

- Built an AI-powered workout planning system generating personalized training plans based on user profile, injuries, and equipment constraints
- Designed a dual-AI pipeline (Gemini + LLaMA fallback) with a local rule engine ensuring safety-first plan generation
- Implemented a safety engine enforcing injury restrictions, fitness-level corrections, and equipment validation before AI execution
- Built a responsive React application with state persistence and structured prompts for reliable AI-generated outputs

Hygiene Surveillance in Food Chain

- Engineered a Java Spring Boot based restaurant hygiene surveillance system using computer vision and CNNs achieving 90% accuracy in mask and glove detection, built a centralized database for analytics and reporting, and developed secure role-based dashboards with CRUD APIs for admins, franchise owners, and managers, improving compliance and customer satisfaction
